Director's Welcome

Welcome to our summer 2014 newsletter. In the past year it has been a pleasure to work with our symposium committee as they have put together our 2014 symposium. In this issue you will see a preview of our upcoming symposium. My hat goes off to Kevin Patel, Joe Provenzano and the many others who are putting the last minute touches on what will be our ninth annual symposium.

Check your calendars! Our symposium is almost here. Held on August 5-7, 2014 in Orlando, Florida, this year's installment of the ISA Water Wastewater and Automatic Controls Symposium is just around the corner. Register today!

We are again back at the Crowne Plaza Orlando-Universal Hotel, and we have a great program lined up this year. We have a keynote from Thomas W. Sigmund from NEW Water (the Green Bay Metropolitan Sewage District), four invited speakers, a forum on automation in the utility of the future, and over 30 other distinguished speakers. You can read more about it in this issue.

Looking for some last-minute training credits? There is still some room in the optional 1-day course on cyber security and the 2-day course on instrumentation/control troubleshooting.

Summer 2014 Newsletter

Like last year, we have teamed up with the Florida AWWA so the CEUs are more broadly recognized for us who need them for your annual operator and engineering license renewals.

In addition to the technical content of our symposium, I also encourage you to take advantage of the networking opportunities at our conference. Each day has a catered lunch and coffee breaks, and there is a Wednesday night general reception. At the reception, I will have the pleasure of handing out the award plaques for the winners of the Best Paper, Best Presentation and Best Poster awards from last year's 2013 symposium. I encourage you to join me in Orlando to recognize last year's symposium award winners.

As you read this newsletter, I encourage you to check out our symposium website at www.isawwsymposium.com. On the website you will find more information about our event that is being held on August 5-7, 2014 and details about how to register for it and the associated training courses.

Warmest Regards,

Graham Nasby, P.Eng., PMP
Director,
ISA Water/Wastewater Division
