

Symposium Planning Update

By Graham Nasby, General Symposium Chair

The symposium committee has been hard at work since I last wrote to you in our Fall 2012 newsletter. Our program committee is taking shape, and I look forward to introducing them to you in our next newsletter. We also have a strong organizing committee this year with both familiar faces and several new members.

I'm pleased to announce the three invited speakers for our symposium. They are:

Bill Hollifield, of PAS, will be giving a follow-up presentation to the "high performance HMIs" talk that he gave this past year. For 2013, he will be presenting results of a recent EPRI study about high performance HMIs and how the findings can be applied to our sector.

Joe Cusimano, of exida, will give a "state of the union" address about the current state of cyber security in municipal water plants in the world. John is also the instructor of the optional 2-day in-depth cyber security course that is being offered in conjunction with the symposium.

P. Hunter Vegas, of Avid Solutions, will present an invited talk about how to plan and manage successful SCADA retrofit projects. Mr. Vegas also recently co-authored a book entitled "100 Tips for a Successful Automation Career" (available at www.isa.org/books)

I'm also pleased to share the details about the two optional ISA training courses that are being offered in conjunction with the symposium. Read on in this newsletter for more details.

Protect your industrial network with FL mGuard

- ✔ High performance router
- ✔ Intelligent security options
 - Firewall
- ✔ Remote support and connectivity
 - Virtual Private Network (VPN)
